## **Tutorial: Play with Steam Overlay**

How to add Tarkov on Steam as non-steam shortcut.

1) Start Server.exe and get your profile ID from launcher.

2) Add EscapeFromTarkov.exe from your SPT-AKI folder to Steam through Games > Add a non-steam game to library.

3) Right click the newly added shortcut and click "Properties".

4) Under launch options, copy and paste below with your ID replaced.

## Code

-force-gfx-jobs native -token=PASTE\_ID\_HERE -config={"BackendUrl":"http://127.0.0.1:6969","
